"With over 35 years experience in dementia care, I thought I knew all there was to know about person centered care until I completed this course virtually. Dr. Dan's program goes beyond our understanding of what we believe person centered care is and demonstrates to us what it should really be.

Each module taught me **new skills and techniques** that enhance the quality of life for all people living with dementia. **What an incredible gift!!** Thank you Dr Dan." - Tracey M., RN, BSN, GNC(c), DDS, Dementia Consultant, Educator & Advocate
