

PUBLIC ANNOUNCEMENT & PRESS RELEASE

Dementia Therapy Specialists (DTS), LLC and Smiles by Delivery (SBD), PLLC are pleased to announce that they have established an alliance that focuses on a collaborative approach to further enhance the quality of life for people living with dementia.

Smiles by Delivery is a house call dental practice based out of Arizona that focuses on caring for senior patients. SBD has developed an innovative, modern process that allows dentists to turn any space into full offices, giving seniors the option to receive regular dental care in the comfort of their homes and avoiding a trek to a bus or separate office.

As a very forward thinking, innovative company, SBD shares the same ethos, and vision as Dementia Therapy Specialists. DTS has developed a program specifically aimed at training dentists and dental staff how to work more effectively with people living with dementia during dental treatment and oral hygiene procedures. The whole team at Smiles by Delivery will receive this training.

SBD Founder and CEO, Elaine Mamola said of this collaboration, “We have been big fans of Dr. Nightingale’s work for some time and are thrilled to be collaborating with him and his company to continue pioneering the best care for people living with dementia. We are always seeking the best methods to treat our patients and working with Dementia Therapy Specialists ensures that we remain on the cutting edge of care for a vulnerable population.”

Dr Daniel Nightingale, CEO at DTS and creator of this program said ‘I am very happy to be working with Elaine and the team at Smiles. It is imperative that dentists and dental teams complete training in how best to support dental patients who are living with dementia. This program attracts 6 CE’s from the Arizona Dental Association and will further enhance the knowledge, skills and confidence in supporting people at any stage of their journey through dementia.’

Kathleen Nightingale, Co-Founder and CFO at Dementia Therapy Specialists added ‘we appreciate the innovative service that Smiles offers, which is so needed by the individuals that we support through our work. It’s in alignment with our philosophy of keeping stress levels down as much as possible, by assisting dementia patients where they’re at; in their own familiar environment. Together we offer the training AND service that results in *true person centered care.*’
